

MOUNTAIN RINGLET RECORD FORM – 2016

Please use this form only for dedicated Mountain Ringlet searches in the seven 1km squares listed below, and please record both successful and unsuccessful searches – for this purpose the latter are just as important.

For positive casual records in other squares please use our website “Sightings” page where possible. Click on **sightings report** on: www.cumbria-butterflies.org.uk/sightings/

NY2508 (Black Crag / Lining Crag)

NY2302 (Hard Knott)

NY1907 (Lingmell SW slope)

NY4709 (Branstree)

NY3807 (Snarker Pike)

NY2908 (Blea Rigg / Codale Tarn)

NY3914 (Arnison Crag).

RECORDER’S NAME:

Please complete a separate column in the table below for each 1-km square searched

Date			
Kilometre square	NY	NY	NY
6 figure grid ref for main concentration if any seen in this km square			
Search start time			
Search end time			
Average sunshine %			
Average Temp deg C			
Wind strength *			
Wind direction			
Number Mountain Ringlets seen in km square			
Notes			

* Wind strength = C L M S (Calm, Light, Moderate, Strong)

If possible please describe the route taken on your walk or attach a map with the route marked.

Please return (email, with scanned or photographed document) to me at: mt@vmst.fsnet.co.uk

Thank you very much for your help and interest in this project.

Martin Tordoff, Butterfly Conservation, Cumbria Branch

Recorders accept that any details on this sheet may be entered into the Cumbria Biodiversity Data Centre's (CBDC) wildlife records database and provided to any third parties having reasonable grounds to require them. Addresses will not normally be passed on but may be used to contact the recorder in order to verify. All verified records will be forwarded by CBDC to Butterfly Conservation's "Butterflies for the New Millennium" national recording scheme.
